Our Story

TinyERP, known today as Odoo, was created in 2005 in Belgium. Odoo's founder, Fabien Pinckaers, set out to address all of the problems he found in the existing business management landscape and provide a solution against all of the outdated, expensive, and non-customizable software that occupied the market. Today, this is how Odoo continues to make a difference: by offering an all-in-one and affordable engine for growth. More than 15 years later, Odoo continues to earn and retain new users at an astonishing rate, worldwide, and lead the market in defining the future of work—powering one business as a time.
